- Collaboration

PROFILE

Highly motivated and driven Web Developer, proficient in building user interfaces and web applications. In 2020, contributed and collaborated on multiple web tools for our members across Australia including building an online store and admin interface end to end. Working in the IT industry I take a continuous approach to learning and up-skilling. I enjoy finding creative ways to solve complex problems that's why I see a career in cyber security as a great opportunity.

EXPERIENCE

WEB DEVELOPER
NEW SUNRISE | APRIL 2020 - CURRENT

New Sunrise is a buying and promotional group that helps independent businesses with marketing, merchandising and connects them with many suppliers. As a Web Developer at New Sunrise I am responsible for creating, maintaining and improving user interfaces and web components and collaborating with my team on a variety of projects to achieve the best possible outcome for our users.

- Created the API Routes and the whole user interface with asp.net and react for our Annual Tradeshow deals replacing the old excel order form.
- Built an online store end to end. Designed and created the database relationships with SQL Server and coded the server side logic in asp.net and built the admin and user interface.
- Added supplier login account for them to access various resources an
- Used SVG to display YTD growth bar charts and interactive line graphs where members can filter by site and by info-source.
- Presenting new ideas or concepts with mock ups and prototypes.
- Updating and adding content through a content management system.
- Optimising search engine results with front-end best practices.

SALES ASSOCIATE
RALPH LAUREN | APRIL 2015 - 2020

Responsible for achieving sales budgets, training and onboarding new employees and visual merchandising.
